

MISSION

Our Philosophy

Starter guides institutions and companies. It helps them think, design and develop as well as manage initiatives on sustainable development.

Since 1998, Starter has been developing a specific competency in the fields of: agriculture, agro-food business, rural development, environment, climate/energy, and management of natural resources.

We want to turn innovative ideas into pilot initiatives, as well as new products and services fostering balanced growth and sustainable use of the resources. We assist our clients in their development paths at different stages. We help them enhance their intervention capacity and foster their growth.

= management

WHAT WE DO

Key points

01 INFORMATION

Starter provides relevant information to finance innovative ideas and projects, mainly with European programmes, national and regional grants as well as with additional funds made available by other public institutions.

02 DESIGN

Starter assists in the design of projects. This includes all fundamental steps, from the feasibility study to the identification of objectives and activities, as well as to the preparation of all documents needed to submit a proposal to the relevant authority.

03 MANAGEMENT

Starter assists in the coordination and management of complex projects featuring numerous activities and international partnerships.

04 DISSEMINATION

Starter creates informative and dissemination materials addressing various target audiences in multiple languages, to promote the results of the projects and increase their visibility.

05 STUDIES AND RESEARCHES

Starter carries out studies and researches in the fields of interest both with its internal staff and in cooperation with important national and international research centres.

06 BUSINESS CONSULTING

Starter helps companies find the most suitable European financing opportunities to carry out their projects in the fields of research, innovation, internationalisation, energy saving, and environmental impact reduction. It also supports them in the creation of partnerships with universities and research centres.

**“Concern for man himself and his fate
must always form the chief interest
of all technical endeavors”**
Albert Einstein
